

K-Challenge

An intense fitness challenge

12 week
Functional Fitness
program

Why K-Challenge?

KemmeFitness.com provides hundreds of workouts. For ease of use, I had created **K-Fit**, a 12 week program to get you started. If you are new to Kemme Fitness, I highly recommend you complete **K-Fit** prior to attempting **K-Challenge**.

The K-Challenge Schedule

K-Challenge is a 4-day a week workout schedule. You can choose what 4 days you exercise. However, because Kemme Fitness workouts are intense, you should not exercise more than 3 days in a row. In other words, make sure you have a rest day or two somewhere in the middle of your workout week. Below are some sample schedules:

Mon exercise

Tues exercise

Wed rest

Thu exercise

Fri exercise

Sat rest

Required Equipment

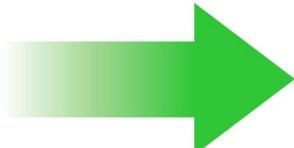

Physioballs (AKA Swiss ball, stability ball) can be bought on sale. They are fitted for height by sitting on the ball with your feet on the floor and having your thighs parallel to the ground.

Kettlebells should be anywhere from 5 to 35 pounds depending on your fitness level.

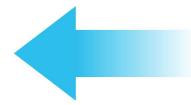

A **Pull-up bar** can be easily made by installing a metal pipe in the rafters. You can always buy a portable bar for a doorway, however, those cost more.

Medicine Balls go on sale a lot. I would suggest one anywhere from 6 pounds up to 12 pounds.

Consider reading [The Low Cost Gym](#) for tips on homemade equipment.

Decoding The Workouts

Circuits—you will complete all of a circuit before moving onto the next circuit if there are more than one (some workouts have 3 or 4 circuits). The bottom of the circuit will tell you the number of rounds for that circuit. Some will say **X2** or **X3**, meaning you do the circuit a total of 2 or 3 times respectively before moving onto the following circuit.

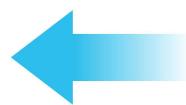

Repetitions—These are usually listed in front of each exercise. Do all the repetitions of that exercise before moving down the list to the next exercise. Some circuits have the repetitions listed at the top for the exercises in the circuit. For example, you may see **21, 15, 9 reps** or a combination similar to that. In that example you have to do all the exercises in the circuit 21 times before starting over and doing them all 15 times. After completing them 15 times, start over again and do 9 reps of each exercise.

Each Side—means that you have to do the prescribed number of repetitions for both sides of your body. For example, you may see **10—each side—Uneven Push-ups**. In that example, you will have to do 10 Uneven Push-ups with your left hand elevated, followed by 10 more Push-ups with your right hand elevated.

Exercises—Most of the exercises will have hyperlinks to video demonstrations in order for you to understand proper form. It may take a while to get over the learning curve, as there will be a great number of new and exciting exercises you have never done before.

What To Do After The 12 Weeks

You could always repeat **K-Challenge**, but personally I would be bored.

I am confident that when you are done with this 12 week program, you will be ready to pick and choose the pre-made workouts off of KemmeFitness.com.

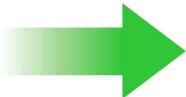

Kemme Fitness has literally hundreds of workouts for you. After you are able to complete **K-Challenge**, you are ready for the rest of the workouts located in either the [At-Home](#) or the [At-The-Gym](#) workout pages.

If you have a gym membership, you will see that we have tons of workouts (more being added all the time) for you to do [At-The-Gym](#).

If you want to workout at home, then you will find plenty of [At-Home](#) workouts to keep you interested for many years to come.
